
Project Details

Project Name:	Personal Portfolio Website
Assigned To:	Emadabathina Teja
Due Date:	2025-04-01

Description:

Project Description:

The **Personal Portfolio Website** is a web-based platform that allows individuals to **showcase their skills, experience, projects, and contact details** in a professional manner. It serves as a **digital resume**, helping freelancers, developers, designers, or professionals highlight their work. This project will be developed using **PHP, Bootstrap, and MySQL** to provide a **dynamic and interactive portfolio**.

Features to Implement

1.

Home Page (Introduction Section)

- Display a **professional profile picture** and introduction.
- Brief summary of **skills, expertise, and career background**.

2.

About Me Section

- Detailed description of **education, experience, and achievements**.
- Downloadable **resume (PDF format)**.

3.

Skills Section

- List of **technical and soft skills** (e.g., PHP, JavaScript, Bootstrap).
-

-
- Visual representation using **progress bars or icons**.

4.

Projects Section

- Showcase **past projects** with:
 - **Project title**
 - **Description**
 - **Technologies used**
 - **Live demo & GitHub link**

5.

Contact Form

- Visitors can **send messages** through a contact form.
- Store messages in a **database** for future reference.

6.

Admin Panel (Content Management System)

- Secure **login for admin** to update content dynamically.
- Add, edit, or delete **projects, skills, and about section details**.

7.

Database Management

- Store **portfolio content, projects, and contact messages** in MySQL.

8.

Security Measures

- Prevent **unauthorized admin access** using secure authentication.
- Validate contact form inputs to **prevent spam and SQL injection**.
