
Project Details

Project Name:	Course Enrollment System
Assigned To:	D. Swathi
Due Date:	2025-04-01

Description:

Project Description:

The **Course Enrollment System** is a web-based platform that allows students to **register for courses online**, while administrators can **manage course offerings and student enrollments**. This system ensures a smooth and structured process for course registration. The project will be developed using **PHP, Bootstrap, and MySQL** for a user-friendly and dynamic experience.

Features to Implement

1.

User Authentication

- **Student registration and login** to enroll in courses.
- **Admin login** to manage courses and student enrollments.

2.

Course Catalog

- Display **available courses with descriptions, instructors, and schedules**.
- Students can **filter courses** by category or instructor.

3.

Course Enrollment System

- Students can **select and enroll** in courses.
-

-
- Prevent **duplicate enrollments** for the same course.

4.

Admin Panel (Course & Enrollment Management)

- Add, edit, and delete **courses and instructors**.
- View and manage **student enrollments**.

5.

Database Management

- Store **course details, student profiles, and enrollment records** in MySQL.

6.

Security Measures

- Prevent **unauthorized access** with session-based authentication.
 - Validate **user input** to prevent SQL injection.
-
