
Project Details

Project Name:	College Admission Portal
Assigned To:	Dangeti Varalakshmi
Due Date:	2025-04-01

Description:

Project Description:

The **College Admission Portal** is a web-based application that allows students to **apply for college admissions online**, while administrators can **manage applications, review student details, and track admission statuses**. This project will be developed using **PHP, Bootstrap, and MySQL** to provide a **structured and efficient admission process**.

Features to Implement

1.

User Authentication

- **Student registration and login** to apply for admission.
- **Admin login** to manage applications and approve/reject requests.

2.

Online Application Submission

- Students can fill out an **application form** with:
 - **Personal details (Name, DOB, Contact Info, Address)**
 - **Academic records (Previous Qualifications, Marks, Certificates Upload)**
 - **Course selection** (Choose preferred course or department)

3.

Application Status Tracking

- Students can **view their application status** (Pending, Accepted, Rejected).
- Admins can **update admission status** after review.

4.

Admin Panel (Application & Student Management)

- View, approve, reject, or request more details for applications.
- Manage **courses and admission quotas**.

5.

Database Management

- Store **student records, application details, and admission decisions** in MySQL.

6.

Security Measures

- Prevent **duplicate applications** using student credentials.
 - Secure file uploads for **academic documents**.
-
