
Project Details

Project Name:	Event Registration System
Assigned To:	Malli Lakshmi Devi
Due Date:	2025-04-01

Description:

Project Description:

The **Event Registration System** is a web-based application that allows users to **register for events online**, while event organizers can **manage registrations, track participants, and update event details**. This project will be developed using **PHP, Bootstrap, and MySQL** to ensure a **structured and efficient event management process**.

Features to Implement

1.

User Authentication

- **Users can register and log in** to sign up for events.
- **Admin login** to manage events and participant records.

2.

Event Listing & Details

- Display **available events** with:
 - **Event Name**
 - **Date & Time**
 - **Venue**
 - **Description**

-
- Users can **filter events** by category (workshops, conferences, webinars).

3.

Event Registration System

- Users can **sign up for events** by filling in their details.
- Store participant records in the **database**.

4.

Admin Panel (Event & Registration Management)

- Admin can **add, edit, and delete events**.
- View and manage **registered participants**.

5.

Confirmation & Notifications

- Show **registration confirmation** after signing up.
- (Optional) Send **email notifications** to participants.

6.

Database Management

- Store **event details, participant records, and user profiles** in MySQL.

7.

Security Measures

- Prevent **duplicate registrations** for the same event.
- Secure user data with **session authentication and SQL injection prevention**.
