
Project Details

Project Name:	Lost and Found Management System
Assigned To:	Pratibha Pattapu
Due Date:	2025-04-01

Description:

Project Description:

The **Lost and Found Management System** is a web-based platform that allows users to **report lost items, register found items, and search for missing belongings**. This system helps individuals and organizations manage lost and found records efficiently. The project will be developed using **PHP, Bootstrap, and MySQL** to ensure a **structured and user-friendly experience**.

Features to Implement

1.

User Authentication

- Users can **register and log in** to report lost or found items.
- Admin login to **verify and manage reported items**.

2.

Report Lost Items

- Users can **submit details of lost items**, including:
 - **Item Name & Description**
 - **Date & Location of Loss**
 - **Upload an Image of the Item**

3.

Report Found Items

- Users can **register found items** with details and images.
- Option to contact the person who reported a lost item.

4.

Search & Filter Lost/Found Items

- Users can **search for lost items** by category, date, or location.

5.

Admin Panel (Item Verification & Management)

- Admin can **approve, edit, or delete item reports**.
- View **matched lost and found items** for verification.

6.

Database Management

- Store **lost and found item details, user records, and reports** in MySQL.

7.

Security Measures

- Prevent **fraudulent claims** by verifying user details.
 - Secure authentication to protect user-submitted data.
-
