
Project Details

Project Name:	Expense Tracker
Assigned To:	Kunche Prasanth
Due Date:	2025-04-01

Description:

Project Description:

The **Expense Tracker** is a web-based application that helps users **record, manage, and analyze their expenses** efficiently. Users can **add, edit, and delete transactions**, categorize expenses, and track spending over time. The project will be developed using **PHP, Bootstrap, and MySQL** for a dynamic and user-friendly experience.

Features to Implement

1.

User Authentication

- Secure **user login and registration** to manage personal expenses.

2.

Add Expenses

- Users can **log their expenses** with the following details:
 - **Amount**
 - **Category** (Food, Travel, Bills, Shopping, etc.)
 - **Date**
 - **Payment Method** (Cash, Credit Card, Bank Transfer)

3.

Edit & Delete Expenses

- Users can **modify or remove** existing expense entries.

4.

Expense Categories & Filters

- Users can **filter expenses** by category or date range.

5.

Dashboard & Expense Summary

- Display a **monthly expense summary** with total spending.
- Graphical representation (Pie Chart/Bar Graph) of expenses by category.

6.

Database Management

- Store **user transactions and expense history** securely in MySQL.

7.

Security Measures

- Prevent **unauthorized access** with session-based authentication.
 - Secure user data using **input validation and SQL injection prevention**.
