
Project Details

Project Name:	To-Do List App
Assigned To:	Boya Hemalatha
Due Date:	2025-04-01

Description:

Project Description:

The **To-Do List App** is a web-based application that allows users to **create, manage, and track tasks efficiently**. This project helps users organize their daily activities by adding, updating, and deleting tasks. The app will be built using **PHP, Bootstrap, and MySQL** to provide a dynamic and user-friendly experience.

Features to Implement

1.

Home Page (Task Dashboard)

- Displays a list of tasks with their status (Pending/Completed).

2.

Add New Task

- Users can create a new task by entering a title and description.

3.

Update Task

- Users can edit existing tasks (change title, description, or status).

4.

Delete Task

- Users can remove tasks they no longer need.

5.

Mark Task as Completed

- Checkbox or button to mark tasks as "Completed" or "Pending".

6.

Database Management

- Store tasks in a MySQL database with attributes (ID, Title, Description, Status, Date).

7.

User Authentication (Optional - for Personal Task Management)

- Secure login system for users to manage their personal tasks.
