Project Details

Project Name:	Freelance Job Marketplace
Assigned To:	Senapathi Madhukumar
Due Date:	2025-04-01

Description:

Project Description:

The **Freelance Job Marketplace** is a web-based platform that connects **freelancers with clients** looking for various services such as web development, content writing, graphic design, and more. The system allows freelancers to **create profiles, bid on projects**, while clients can **post jobs and hire professionals**. This project will be developed using **PHP, Bootstrap, and MySQL** to ensure a **structured and efficient job marketplace**.

Features to Implement

1.

   User Authentication

   - **Freelancer & Client registration and login**.

   - Secure login with **password hashing**.

2.

   Job Posting System (For Clients)

   - Clients can **post jobs** with:

     - **Job title & description**

     - **Budget range**

     - **Required skills**

3.

Freelancer Bidding System

- Freelancers can **browse available jobs** and submit bids.

- Clients can **review bids and hire** freelancers.

4.

Profile Management

- Freelancers can **create profiles** showcasing their skills, experience, and portfolio.

- Clients can **view freelancer profiles** before hiring.

5.

Project Management & Status Tracking

- Clients and freelancers can **communicate and track project progress**.

- Mark projects as **In Progress, Completed, or Canceled**.

6.

Admin Panel (User & Job Management)

- Admin can **manage users, jobs, and resolve disputes**.

7.

Database Management

- Store **user profiles, job listings, bids, and project details** in MySQL.

8.

Security Measures

- Prevent **fake job postings and spam bids** using admin verification.

- Secure data with **session authentication and SQL injection prevention**.
