Project Details

Project Name:	Simple Blog System
Assigned To:	K Mohan Krishna
Due Date:	2025-04-01

Description:

Project Description:

The **Simple Blog System** is a web-based platform that allows users to **create, edit, delete, and view blog posts**. It provides a structured way for individuals or businesses to share articles, news, or updates in an organized manner. The project will be built using **PHP, Bootstrap, and MySQL** to ensure a dynamic and responsive experience.

Features to Implement

1.

   Home Page

   - Displays a list of recent blog posts with titles, snippets, and publication dates.

   - Pagination to navigate older posts.

2.

   Blog Post Page

   - Full view of a blog post with title, content, author, and date.

3.

   User Authentication

   - Admin login system to manage blog posts.

4.

Admin Panel

- Create new blog posts.

- Edit existing posts.

- Delete posts.

5.

Database Management

- Store blog posts in a MySQL database.

- Maintain post details (title, content, date, author).

6.

Contact Form (Basic Inquiry System)

- Users can submit inquiries via a form.

- Messages are stored in the database for the admin to view.
