Project Details

Project Name:	Online Quiz System
Assigned To:	Mallangi Gayathri
Due Date:	2025-04-01

Description:

Project Description:

The **Online Quiz System** is a web-based platform that allows users to **participate in quizzes, view results, and track their scores**, while administrators can **create, manage, and evaluate quizzes**. This project will be developed using **PHP, Bootstrap, and MySQL** to provide a **structured and automated quiz-taking experience**.

Features to Implement

1.

   User Authentication

   - **Students register and log in** to attempt quizzes.

   - **Admin login** to create and manage quizzes.

2.

   Quiz Management (Admin Panel)

   - Admin can **add, edit, and delete quizzes**.

   - Add **multiple-choice questions (MCQs)** with:

     - **Question Text**

     - **Answer Choices**

     - **Correct Answer**

3.

Quiz Attempt System

- Users can **select a quiz and start the test**.

- **Timer feature** to set a time limit for quizzes.

4.

Automated Scoring System

- System **automatically evaluates quiz submissions**.

- Display **quiz results immediately** after submission.

5.

Leaderboard & Score Tracking

- Users can **view their past quiz scores**.

- (Optional) **Leaderboard** showing top scorers.

6.

Database Management

- Store **quiz questions, user responses, and scores** in MySQL.

7.

Security Measures

- Prevent **multiple quiz attempts** from the same user.

- Secure user authentication and **prevent cheating**.
